Abstract: Subpart K within 40 *CFR* Part 262 provides a flexible and protective set of regulations that address the specific nature of hazardous waste generation and accumulation in laboratories owned by colleges and universities, including teaching hospitals and non-profit research institutes that are either owned by or formally affiliated with a college or university. In addition, eligible academic entities have the discretion to determine the most appropriate and effective method of compliance with these requirements - by allowing them the choice of either managing their hazardous wastes in accordance with the alternative regulations as set forth in Subpart K, or remaining subject to the existing generator regulations.

Form Numbers: None.

Respondents/affected entities: Business and other for-profit, as well as State, Local, and Tribal governments.

Respondent's obligation to respond: Required to obtain or retain a benefit (Sections 2002, 3001, 3002, 3004 of RCRA)

Estimated number of respondents: 283

Frequency of response: On occasion

Total estimated burden: 157,950 hours per year. Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$13,452,535 (per year), includes \$255,365 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase of 122,137 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an adjustment to the existing estimates based on data gathered through industry consultations and review of the Resource Conservation and Recovery Act Information (RCRAInfo) national database, not due to program changes. For example, following industry consultations, the estimated amount of containers and labs per eligible academic entity increased substantially relative to the previous ICR.
